Personal time

Rust

Lua

Gleam

### EXPERIENCE

#### PlayUp / Co-Founder & Lead Full Stack Engineer

2021 - Present

- Built the platform as a sole engineer from idea to generating £300,000+ yearly revenue.
- Implemented code quality measures, E2E tests and CI pipelines resulting in a 30% reduction in user bug reports.
- Implemented an email microservice to track email delivery, bounces and complaints to improve reliability and identify potential issues.
- Interacted directly with users to fix their pain points and guide future features.
- Led the engineering team in development of React Native mobile app.
- Involved in all aspects of building the business, from product design and marketing to funding and hiring.

Tech Stack: React | Node | Typescript | React Native | MongoDB | Terraform

#### Chaeban / Full Stack Engineer

2020 - 2021

- Optimized React customer-facing e-commerce site improving cart abandonment by 17% and increasing subscription service conversion by a further 3%.
- Modified the staff backend, adding new functionality to improve workflow.
- Integrated Node backend system with the company's accounting, logistics, and delivery services, creating a centralized source of truth and streamlining previously manual operations.

Tech Stack: React | Node | Javascript | SQL

#### Trademark Technology / Full Stack Engineer

2012 - 2020

- Worked on over 30 client projects of various sizes and complexities, as a solo engineer and as part of teams.
- Developed accounting systems, CMS, mobile apps, small business sites, blogs across different industries, using different technologies.

Tech Stack: Wordpress | Laravel | Vue | MySQL | React | Swift
