Personal time

Rust

Lua

Gleam

### EXPERIENCE

#### PlayUp / Co-Founder & Lead Full Stack Engineer

2021 - Present

- Developed the platform independently from conception to achieving £300,000+ annual revenue.
- Introduced code quality standards, E2E tests, and CI pipelines leading to a 30% decrease in user-reported bugs.
- Established an email microservice for monitoring email delivery, bounces, and complaints to enhance reliability and troubleshoot potential issues.
- Engaged directly with users to address their concerns and shape upcoming features.
- Guided the engineering team in creating the React Native mobile application.
- Participated in all business facets such as product design, marketing, funding, and recruitment.

Tech Stack: React | Node | Typescript | React Native | Go | MongoDB | Terraform

#### Chaeban / Full Stack Engineer

2020 - 2021

- Improved React customer-facing e-commerce site, reducing cart abandonment by 17% and boosting subscription service conversion by an additional 3%.
- Enhanced staff backend by implementing new features to enhance workflow efficiency.
- Integrated Node backend system with company accounting, logistics, and delivery services to centralize and automate manual processes.

Tech Stack: React | Node | Javascript | SQL

#### Trademark Technology / Full Stack Engineer

2012 - 2020

- Managed and contributed to 30+ client projects, both independently and collaboratively.
- Built accounting systems, CMS platforms, mobile applications, small business websites, and blogs for diverse industries using a variety of technologies.

Tech Stack: Wordpress | Laravel | Vue | MySQL | React | Swift
